Portfolio: sakshamsahu.me | Faridabad, India

EDUCATION

Bennett University

Bachelor of Technology in Computer Science Engineering; CGPA: 8.72

Aug 2023 – Jun 2027

Noida, India

EXPERIENCE

DRDO, Ministry of Defence

Generative AI Intern

May 2026 - Jul 2026

- Engineered secure, locally hosted Advanced RAG systems on **Unix/Linux** environment using LLMs, vector databases and embedding models, achieved **92.5% retrieval accuracy** on confidential knowledge base benchmarks while reducing query latency by **~25%**
- Developed **Hybrid RAG** architectures with semantic search, keyword retrieval and reranking to improve retrieval
- Built scalable document processing pipelines handling **11,000+ pages**, including chunking, embedding generation, indexing, and structured **logging** for debugging, reducing hallucinations through multi-stage retrieval.

Imarticus Learning

Data Analyst Intern

Jun 2025 - Jul 2025

- Led a team of **5 analysts** to develop **interactive dashboards** delivering key business insights to stakeholders
- Analyzed **50,000+ row** business datasets using **MySQL, Python and Power BI** to extract actionable insights
- Visualized insights using **Matplotlib and Seaborn** for weekly stakeholder reports

SKILLS

Languages : C++, Python, Java, JavaScript, TypeScript

Web & Backend : React.js, Next.js, Node.js, Express.js, REST API

Databases : MySQL, MongoDB, PostgreSQL, Vector Databases

Tools : GitHub, Postman, Power BI, Figma

Cloud & DevOps : AWS(ECR, ECS, EC2, ALB), Docker, Git, CI/CD pipelines

Core CS : Data Structures & Algorithms, OOPs, DBMS, Operating System, Computer Networks, System Design

Gen AI : RAG, LLMs, LangChain, Prompt Engineering, ChromaDB, Vector Search, Semantic Search, Embedding Models

PROJECTS

Parakh Trading Intelligence | NestJS, TypeScript, Kafka, TimescaleDB, Redis, Docker, OpenTelemetry

Aug 2026 - Ongoing

- Architected an event driven algorithmic trading platform using **9 microservices** and **Kafka**, decoupling real time market data ingestion, backtesting and alert generation.
- Engineered high throughput data pipelines using **TimescaleDB** for time-series analytics and **Redis caching**, integrating circuit breakers for resilient third party API consumption.
- Deployed a horizontally scaled infrastructure load balanced by **Nginx**, integrating distributed tracing **OpenTelemetry** and metrics (**Prometheus, Grafana**), validated via k6 load testing.

Askra AI | React.js, FastAPI, LangChain, LLMs, MongoDB, ChromaDB, Gemini API, JWT

Jun 2026

- Architected a **7-layer agentic RAG pipeline** with intent routing across RAG, OCR, code and chat tools
- Built hybrid **FAISS + BM25** retrieval with cross-encoder reranking and **LLM as judge** self-correction to cut hallucinations
- Shipped async **FastAPI** backend with **JWT**-secured RBAC and real-time **SSE** streaming, improving precision by **35%**

Social-ish | React.js, Node.js, MongoDB, WebSocket, Gemini API

Apr 2025

- Built and deployed a **full stack social platform** for introverts with interest based matching and real time WebSocket chat
- Integrated an **AI chatbot** using the Gemini API with custom prompt engineering for personalised conversation support
- Designed a scalable REST API with **JWT authentication** and MongoDB indexing for fast interest matching queries

ACHIEVEMENTS

LeetCode

Solved **700+ DSA problems** | leetcode.com/u/amSaksham

Ongoing

Innovate 2.0: Hack to Build – IIIT Noida

National level Winner among 200+ teams

2024

TechArena 2025 Project Showcase

Secured 3rd position

2025
